ISO 9001:2008 REGISTERED

SURFACE (MODULE) TEMPERATURE SENSOR – MODEL DWMT 8105

Sensing element	:	RTD (PT1000)
Measuring range	:	- 40 to 100 deg C
Accuracy	:	± 0.3 Deg C
Output	:	Resistance proportional to temperature.
Mounting	:	Embedded in a low profile white weatherproof plastic enclosure

Note : The output is resistance proportional to temperature . However an interface can be provided for voltage or current (4-20 ma) output and the mounting can be custom made on request . This will involve additional cost
